The recent Francis Report highlighted that at Mid Staffordshire NHS Trust there was a “failure to keep nursing records adequately or at all...there was a failure to comply with professional guidelines”.

At Standex Systems we specialise in providing patient documentation that is easy to use and fit for purpose allowing all care to be documented but making sure that nursing staff are not plagued by unnecessary paperwork.

Having the correct patient documentation is imperative to ensure that the care being given is evidenced. We are established and very successfully running ongoing projects in Trusts such as Oxleas NHS Trust, Epsom and St Helier NHS Trust and Wye Valley NHS Trust, serving both inpatient and community documentation requirements.

Standex Systems work in collaboration with the Trust to provide all your patient documentation needs and may include such records as:

What are the benefits of using our documentation?

All the documents we provide:

- ensures best practice and compliance with Clinical Governance
- cover those who are inpatients for both short and long stay
- suit 80% of the patient population
- may include speciality paperwork (e.g. ITU, specialised pathways)
- make it easier to document care as it is clear and concise
- make it easier to record all the relevant risk assessments required
- include all mandatory assessments such as Pressure Ulcer, Falls, Manual Handling and Malnutrition Universal Screening Tool and more
- are more streamlined
- make it easier to find patient information retrospectively
- are easier to audit
- don't require repetition of information

Benefits of having the Standex System in place:

- years of experience in documentation implementation and ongoing management
- nursing knowledge (Nurse Advisor)
- we organise the whole process so that you do not have to use internal resources and time
- allow information sharing with other trusts
- generic records throughout the Trust
- the documentation is bespoke to your Trust
- elimination of photocopying
- adaptations can be made on a periodic basis in line with changes in legislation and best practice to ensure all paperwork is up to date
- documents can be added as required
- national records can be incorporated (e.g. National Early Warning Score: ‘NEWS’)
- better communication between multidisciplinary teams across the hospital
- more effective patient transfers from ward to ward
- ongoing support and assistance
- managed stock levels
- budget is at ward level
- easy to re-order
